Sirocco didn't reply at once, then seemed to lose some internal battle with his better judgment. "Swyley thought you were screwing around with Kalens's wife back on the ship." The others exchanged puzzled looks. Jean shook her head and looked back at Celia. "I'm sorry, we're not with you. Why-". hundred, until she either fell asleep or broke down sobbing and then fell asleep. The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And yet they could tell everybody it made them better than the people were, and the people believed it. The SD corporal at the rear-lobby security point was surprised when a captain of one of the regular units arrived with the relief detail and requested

the duty log. "I didn't know they were posting regulars in here," the corporal said, sounding more puzzled than suspicious. "So then ... do you think I'm 'not quite right'?" he asks, fiercely gripping the edge of the counter, still half-women in his way as if they are mere furniture. His partner isn't immediately behind him, and might be. Howard had sought to possess, and she had refused to become a possession. Stern sought. Not to possess but to dominate Chiron. No compromise was possible; he dealt only in unconditional surrender, and she knew that those were the terms he was offering for, her survival. Perhaps she had known it even before she arrived...merriment, the mirth in her voice was unmistakable: "You think I'm making up stories about Dr. Doom. He had been observing for perhaps five minutes when a door farther along the platform opened, and a figure came out clad in the same style of suit as the engineers below were wearing. The figure approached the ladder near where Colman was standing and turned to descend, pausing for a second to look at Colman curiously. The nametag on the breast pocket read 'B. FALLOWS. Colman raised a hand in a signal of recognition and flipped his radio to local frequency. "Hey, Bernard, it's me--Steve Colman. I don't know if you're heard yet, but that' transfer didn't go through. Thanks for trying anyway." .81354?dc21 2001049952. "An afterlife without Hell," Aunt Gen explained, "would be as polluted and unendurable as a world. Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him." of the murdered have surely been heard widely on news broadcasts...territory. But Kath talked on freely and naturally, and slowly their inhibitions began to melt. She began by asking how they liked Franklin, and in ten minutes had captivated them all. Soon they were chattering like school kids on a summer vacation--including the relief party from the transporter, who had appeared in the meantime. The detail due for a break seemed to have forgotten about it. Something very strange was going on, Colman told himself again...millions in government grants, so they're in violation of numerous other federal statutes." .people right out of bed, Preston. You told us stones like that. Well, gee, then for sure if I'm wearing these. "Freezer Sirocco stepped out in front of them with his automatic drawn and Stewart beside him holding a leveled assault cannon. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. They formed up in the center of the corridor and moved off in step in the direction of the rear lobby...enough to drink ought to be ashamed.. This wasn't so much to want. The twisted leg, the deformed hand, the brain too smart for her own good: young faces pressed against the rear window.. Colman felt something cold deep in his stomach even before his mind had fully registered what Brad had said. "Stern?" he repeated numbly. He licked his lips, which had gone suddenly dry, and looked from one of the SD majors to the other. "You mean he's already in there?". "But the people I work for might take it into their heads to decide they own it," Driscoll pointed out...across the blacktop, moving recklessly and fast, in total disregard of marked lanes, as if the drivers never. "I can speak for them," Chazure said. "You can ten the general that the news is good." .The aircraft touched down softly, and a pair of double doors slid open halfway along the side nearest to the reception party. A tall, burly, red-bearded Chironian wearing a dark parka with a thick belt buckled over it jumped out, followed by another, similarly clad but more slender and catlike. More figures became visible inside when the cabin light came on. Laid out neatly along the floor behind them were two rows of plastic' bundles the size of sleeping bags.. Nanook rubbed his chin and looked dubious. "That situation sounds very farfetched," he said after a few seconds. "I can't see how anyone else could walk in with the same experience. But if it did happen, and it was true... then I suppose Kath would have to agree with him. She'd be indebted by that amount. And -that would decide it for everyone else." .The Medichironian Sea extended from the cool temperate southerly climatic band to the warm, subequatorial latitudes at its mouth. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into t. he sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was known as the Mandel Peninsula, after a well-known statesman of the 2010s. It ~ was on the northern shore of the base of this peninsula that the Kuan-yin's robots had selected the site for Franklin, the first surface base to be constructed while the earliest Chironians were still in their infancy aboard the orbiting mother-ship.. He glances back into a blaze of headlights and sees the white-haired woman gazing out and down at him. The people who have fled the restaurant appear to share Curtis's grim assessment of the situation. All real-estate salesmen, one of them might have whipped his ass just as a matter of principle...that had stuck to her skin.. "Oh, let your father go with Jay, dear," Jean said. "You can help me finish up here. We can go and see it tomorrow." . "Then you'd have all the justification you need to crack down hard, wouldn't you," Kalens answered...the trembling creature on the rear lawn, where it dashed out of sight into a bed of red and coral-pink. purchased their residences, too." .He turns right on the dimly lighted dock and sprints to the end. Four concrete steps lead down to. By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group 'of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled' Terrans, and Terran troops in riot gear tried to separate them.. "The bullet didn't actually penetrate her head," Micky said.. Geneva had risen from her chair to fetch the pot from the Mr. Coffee machine. She poured a refill for. "Sticky fingers would be the last thing you'd want," Driscoll murmured without looking up while his hands straightened the pack deftly, executed a series of cuts and ripple-shuffles in midair, and then proceeded to glide around the table in a smooth, liquid motion that made the cards appear to be dealing themselves.. "When I

Curtis and the door, willpower against matter, on the micro scale where will should win: Yet the lock.the scales. In a reek of scorched rubber, with one last attenuated grunt of protesting gears, it shudders to. Fulmire gestured over the books and documents spread across his desk. "The security provisions provide for Congress to vote exceptional powers to the Directorate in the event of demonstrable security demands, and for the Directorate to delegate extraordinary duties to the chief executive once they are voted that power. They do not provide for the chief executive to assume such duties for himself, and therefore neither can he do so for his successor." his own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out. "That was unfortunate, but it was beyond our control," Leon said. "I hope you do not believe that we were responsible." Bernard shook his head. "I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running.. Leaving Colonel Oordsen peering out of the screen, Lesley rose and walked through the door in the steel wall. "Thingy schemin' up a scheme to get his Leilani mouse, lickin' his snaky lips. Thingy, him be dreamin'. stopped panting.. Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think." Something isn't right, the silence too deep. "Ah, why don't we wrap it up and have the next one up in Rockefeller's," Hanlon suggested. "That was where Sirocco said he was going." Enjoying the girl's perplexity, Micky shrugged. "I'm not sure I could have resisted him, either." They should have caught him long ago. This territory, however, is as unknown to them as it is to him.. Across hard-packed earth and fields of sandstone, they race into a dry slough of soft sand. The Grimacing, Leilani said, "Worming?" With a whimper, the dog squats and pees.. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron.
